It is also clarified here that-

S.N.	Situation	Suggestion/Provision
1	Hospital is working for more than two years but location of hospitals has been changed due to shifting of building. Since Rajasthan Pollution Control Board issues certificate for specific location, therefore such newly shifted hospital cannot provide certificate of Rajasthan Pollution Control Board as a proof for working for two years.	Hospital shall have to submit certificate as per amended provision as a proof for more than two years of working. Name and ownership of hospital should be the same. In the new set up, hospital must fulfill all other essential criteria too.
2	Hospital is working for more than two years but ownership of hospital or name of hospital have been changed.	Application of such hospital can be considered, provided the new hospital owner/(s) was not punished (Penalty/De-empanelment) for found to be indulged in any kind of fraudulent activity in the previous phase/current phase of the scheme.

This bears approval from competent authority.
